

A new world through smart robot service

**ROFA, leading the global robot
convergence era**

Robot of Factory Automation

Robots are in the spotlight as an industry that will lead the future because of their endless applications in various industries. Since its establishment in 2014, ROFA Co., Ltd. has been taking the lead in investment and technology development to provide the best solutions to customers under the vision of 'providing a convenient smart robot service leading the era of robot convergence'. We are providing handling robots suitable for industrial sites based on the robot development and robot application that we have accumulated over the years, and we are developing the robot application system business through active R&D and human investment.

ROFA Co., Ltd. is a company leading the era of robot convergence based on the capabilities it has accumulated so far. All executives and employees of ROFA Co., Ltd. will realize customer satisfaction service through continuous technological innovation to enhance business competitiveness, considering customer trust and best satisfaction as corporate values.

CEO An, Byong Hwa

ROFA Co., Ltd. is

For the dissemination of free and convenient robots
Contemplating new mechanisms and studying details
We want to contribute to the creation of an innovative
manufacturing industry.

Company	ROFA Co., Ltd.
Location	34, Wollim-ro 65beon-gil, Seongsan-gu, Changwon-si, Gyeongsangnam-do, Republic of Korea
CEO	An, Byong Hwa
Sales	4.2 billion won (2020)
Event	Robot automation system and related equipment

History

2014. 05

- Established ROFA company
- Development and application of driving robot

2015. 05

- Hyundai Mobis company registration
- Central business registration

2018.01

- Established Ropa Co., Ltd.
- Acquired CLEAN workplace certification
- Registered as a company in Myunghwa Industry
- Venture business registration
- Establishment of an affiliated research institute

2019.03

- Technology evaluation (T-A) Obtain a certificate
- ISO 9001, 14001

2020. 11

- Electric Vehicles in Changwon Waste battery business kick-off
- Changwon City Excellent Company Award

2021. 02

- Signed MOU with Changwon City (Electric vehicle waste battery business)
- Signed MOU with SK networks (Waste battery reuse / recycling business)

2021. 03

- Electric vehicle waste battery dismantling robot automation System patent application

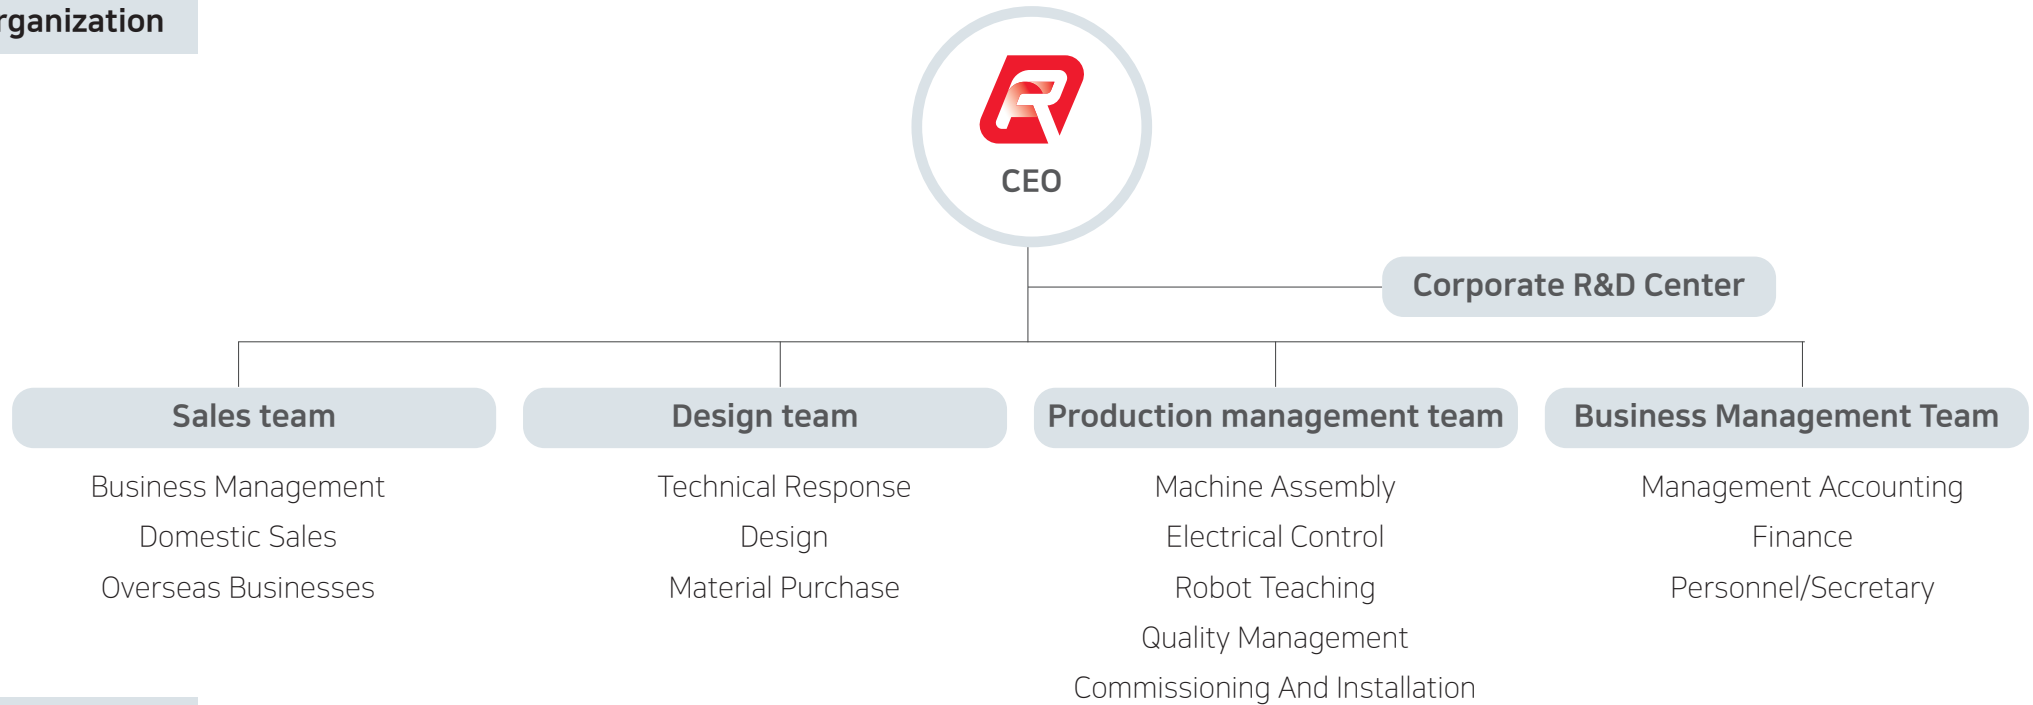

2021. 06

- VOLVO company registration

2021. 09

- Central 'Reborn' project contract and business agreements (related to waste batteries)
